### CLIENT TESTIMONIAL

I am incredibly happy with the Counselling package. After five sessions with Hilda, I transferred over to one of her interns at the clinic for follow up work. I was able to see someone in two weeks and I really did have a positive and nourishing experience all the way through.

Despite the clinic counsellor intern's newness to the field (versus Hilda's experience,) I was impressed with the quality of her skills and the work we did together has had a significant impact. Hilda's supervision of the intern throughout the time enabled a consistency, and for me an extra bonus of two perspectives and voices.

I felt surrounded by care and support and I just loved the clinic atmosphere and the fact that I was supporting an important community initiative and the student's growth. 600% thrilled with the social-justice model of the clinic, the quality of the counselling and the package which allowed me a considerable chunk of effective therapy at a minimal cost!!

Thank you everyone – I hope to volunteer with you soon.
